

## Importing and Export File Attachments with JavaScript

The functionality presented in this file can only be used from within Adobe Reader when the PDF file is enabled with Reader “Embedding” Rights, which this file does not have.

### Import a Named File Attachment:

Using an existing file attachment name will overwrite that file with the new import

Attachment Name:

Description:

### Export a File Attachment

In Windows, types not allowed to be exported from a PDF (exe, js, com, zip, etc) are stored in the registry key:

**HKEY\_LOCAL\_MACHINE\SOFTWARE\Policies\Adobe\AdobeAcrobat\8.0\FeatureLockDown\cDefaultLaunchAttachmentPerms**

Select Attachment Name:

:Save

:Save & Launch

:Just Launch
